Education

Carnegie Mellon University, B.S. in Computer Science with Concentration in Security & Privacy 2017-2021

- Undergraduate instructor and course creator for *The Way We Live Now*, a seminar examining the relationship between technology and person-hood

Work Experience

Senior Software Engineer, Figma - Infrastructure 2021-current

- Scaled LiveGraph, Figma's GraphQL-with-updates service, from 600k to 2M user sessions, 60M to 300M queries, one table to tens of horizontally sharded databases. LiveGraph includes an in-memory cache, GraphQL back-end with extra features such as computed fields and permissions.
- Co-led team in complete overhaul of back-end architecture, including a new query engine, invalidation service, and shadow-read system for migration
- Implemented many performance optimizations, improving latency, memory, and CPU by >50%
- Re-architected cookie-based authentication system for 3M users with new data store and algorithm
- Advocated for gender minorities in engineering as Community Lead of 100+ engineers

Summer 2019

Software Engineer Intern, BuzzFeed - Infrastructure

- Member of the Tech News Working Group, a partnership between engineers and journalist, where I conducted network traffic analysis for investigation of FaceApp and answered technical quesetions
- Set up continuous deployment of configur files via S3 to dramatically decrease code release delay

Research

CyLab Security & Privacy Institute, Researcher 2020-2024

- Designed novel study to measure tracking for real human browsing and analyze accuracy of differently configured web crawlers compared to human data
- Created browser extension and data pipeline to collect third-party trackers and fingerprint-ers, and seed crawlers with user data

A Phenomenological Approach to Life Under Surveillance 2020

- Co-authored research essay surveying theories of surveillance and uncovering constitutive conditions that allow them to prevail based on a phenomenology of social, corporate, and state surveillance

Perception vs. Realities of Online Data Profiling 2019

- Conducted campus survey to determine whether Facebook Ad profiling data matches expectations
- Won Best Poster Award for Privacy Policy, Law & Technology class at Carnegie Mellon

Other involvements

School for Poetic Computation, participant in Solidarity Infrastructures and Machine Languages courses
Collective Action School, an experimental school for tech workers to create collective change in industry: participant in Cohort #2, steward for upcoming Cohort #3
Figma Engineering Blog: Keeping it 100(x) with real-time data at scale
Homegrown apps & trust models: Collective Action School Yearbook
Taper #13: Scripted Readings
Reboot Magazine: Book Review for Hegemony Now, Essay about electronic line calling in tennis
Lunar Gala: Obfuscate: Designer and creator of fashion line creating clothing to obfuscate oneself from the camera, which received a micro-grant from the Frank-Ratchye Studio for Creative Inquiry
